Most people know the basics about laser hair removal, but VelaShape™, the newest and most popular non-surgical alternative to liposuction, is making waves in the news as Kim Kardashian announced last year that she had undergone the procedure. VelaShape™ is the only FDA-approved device that effectively and safely contours,

shapes and slims the body by reducing cellulite and firming problem areas in as little as four treatments, all with little to no downtime.

Amerejuve is Houston's number one provider of laser hair removal, cosmetic and non-surgical skin treatments. Med Spa services include BOTOX®, Restylane®, Juvederm®, Refirme™, IPL Photofacial, skin tightening, microdermabrasion, and chemical peels, all available at four state-of-the-art facilities with locations in Katy, Sugar Land, League City and the Galleria area. To schedule a free consultation at any of the four Amerejuve locations in the Greater Houston area, call (713) 960-6262. For a complete list of services, visit <http://www.amerejuve.com>.
